Book description

This is the finale of the series and it ended with a bang. I pretty much figured out who this other very strong power (different Power from the last book) was from the very beginning. And I made the correct guess. I loved the ending of this series, so much more than the last book. This conclusion redeemed the previous book. I felt it was justifiable and fitting retribution, but I don't want to give it away. This is a well-written series and I highly recommend it to the ages 14 and up. The Twilight series is actually for a more mature audience, especially the last book. The Vampire Diaries doesn't really have too many adult themes. In this book it's called Dark Reunion, because there is a reunion. I won't tell you who or why they get reunited or even how, but supernatural forces are at work. It's called Vampire Diaries because at least one central character keeps a diary, a journal. It's very

popular to keep a diary at a young age, especially young girls. I think I started at age 12. Anyway, the ending was jubilant. This last and final book of the main series was suspenseful and really good. I was very excited and surprised by the ending. There's a werewolf in this series too, like Twilight, but he's not as charming. I recommend this series for those who enjoyed the Twilight series and especially High School students. Very endearing.
